# Master Planning Process/Progress

## Master Planning Chapters

1. Introduction ✓
2. Existing Conditions ✓
3. Forecast (FAA) ✓
4. Facility Needs ✓
5. Alternatives- Presenting
6. Airport Layout Plan (FAA)
7. Financial/Implementation Plan

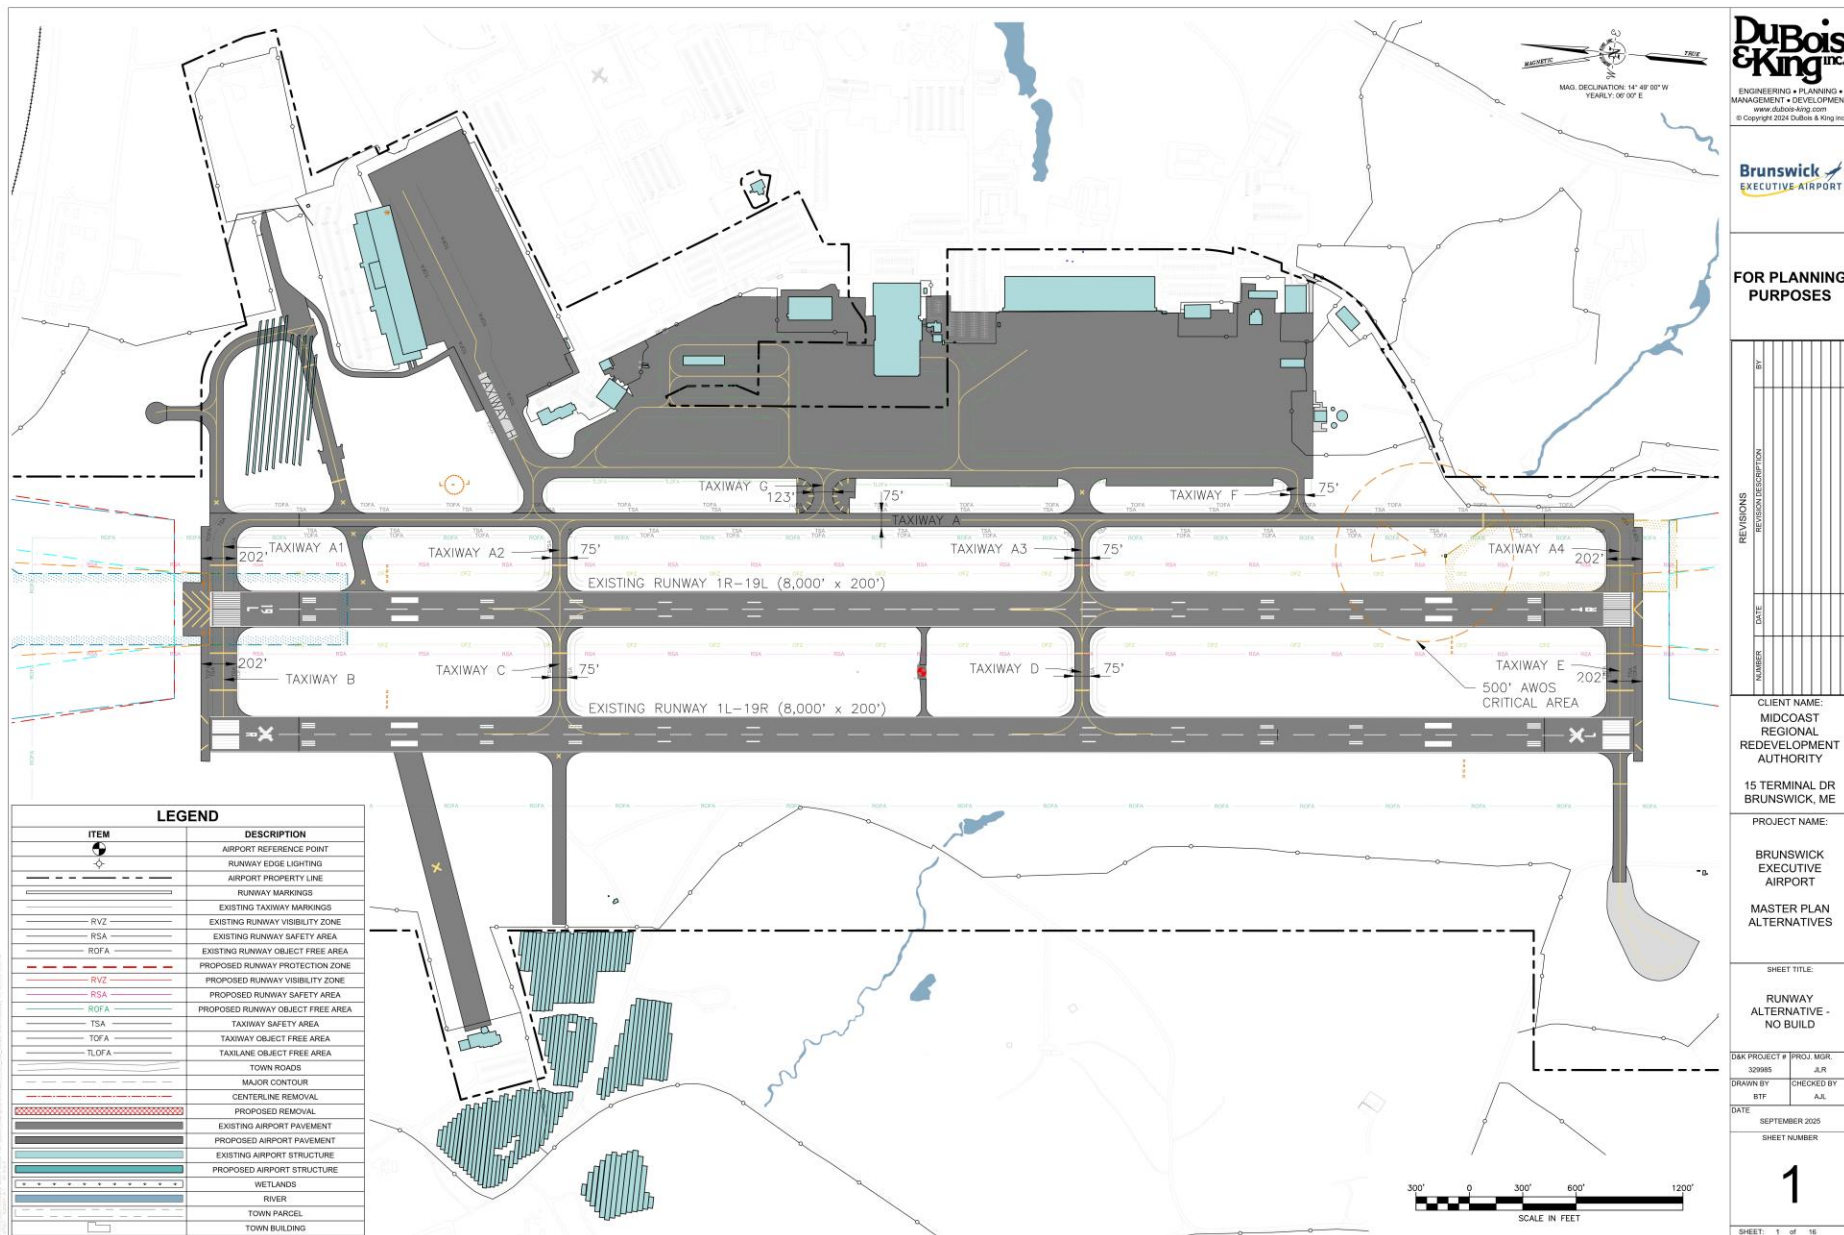

# Guiding Principles

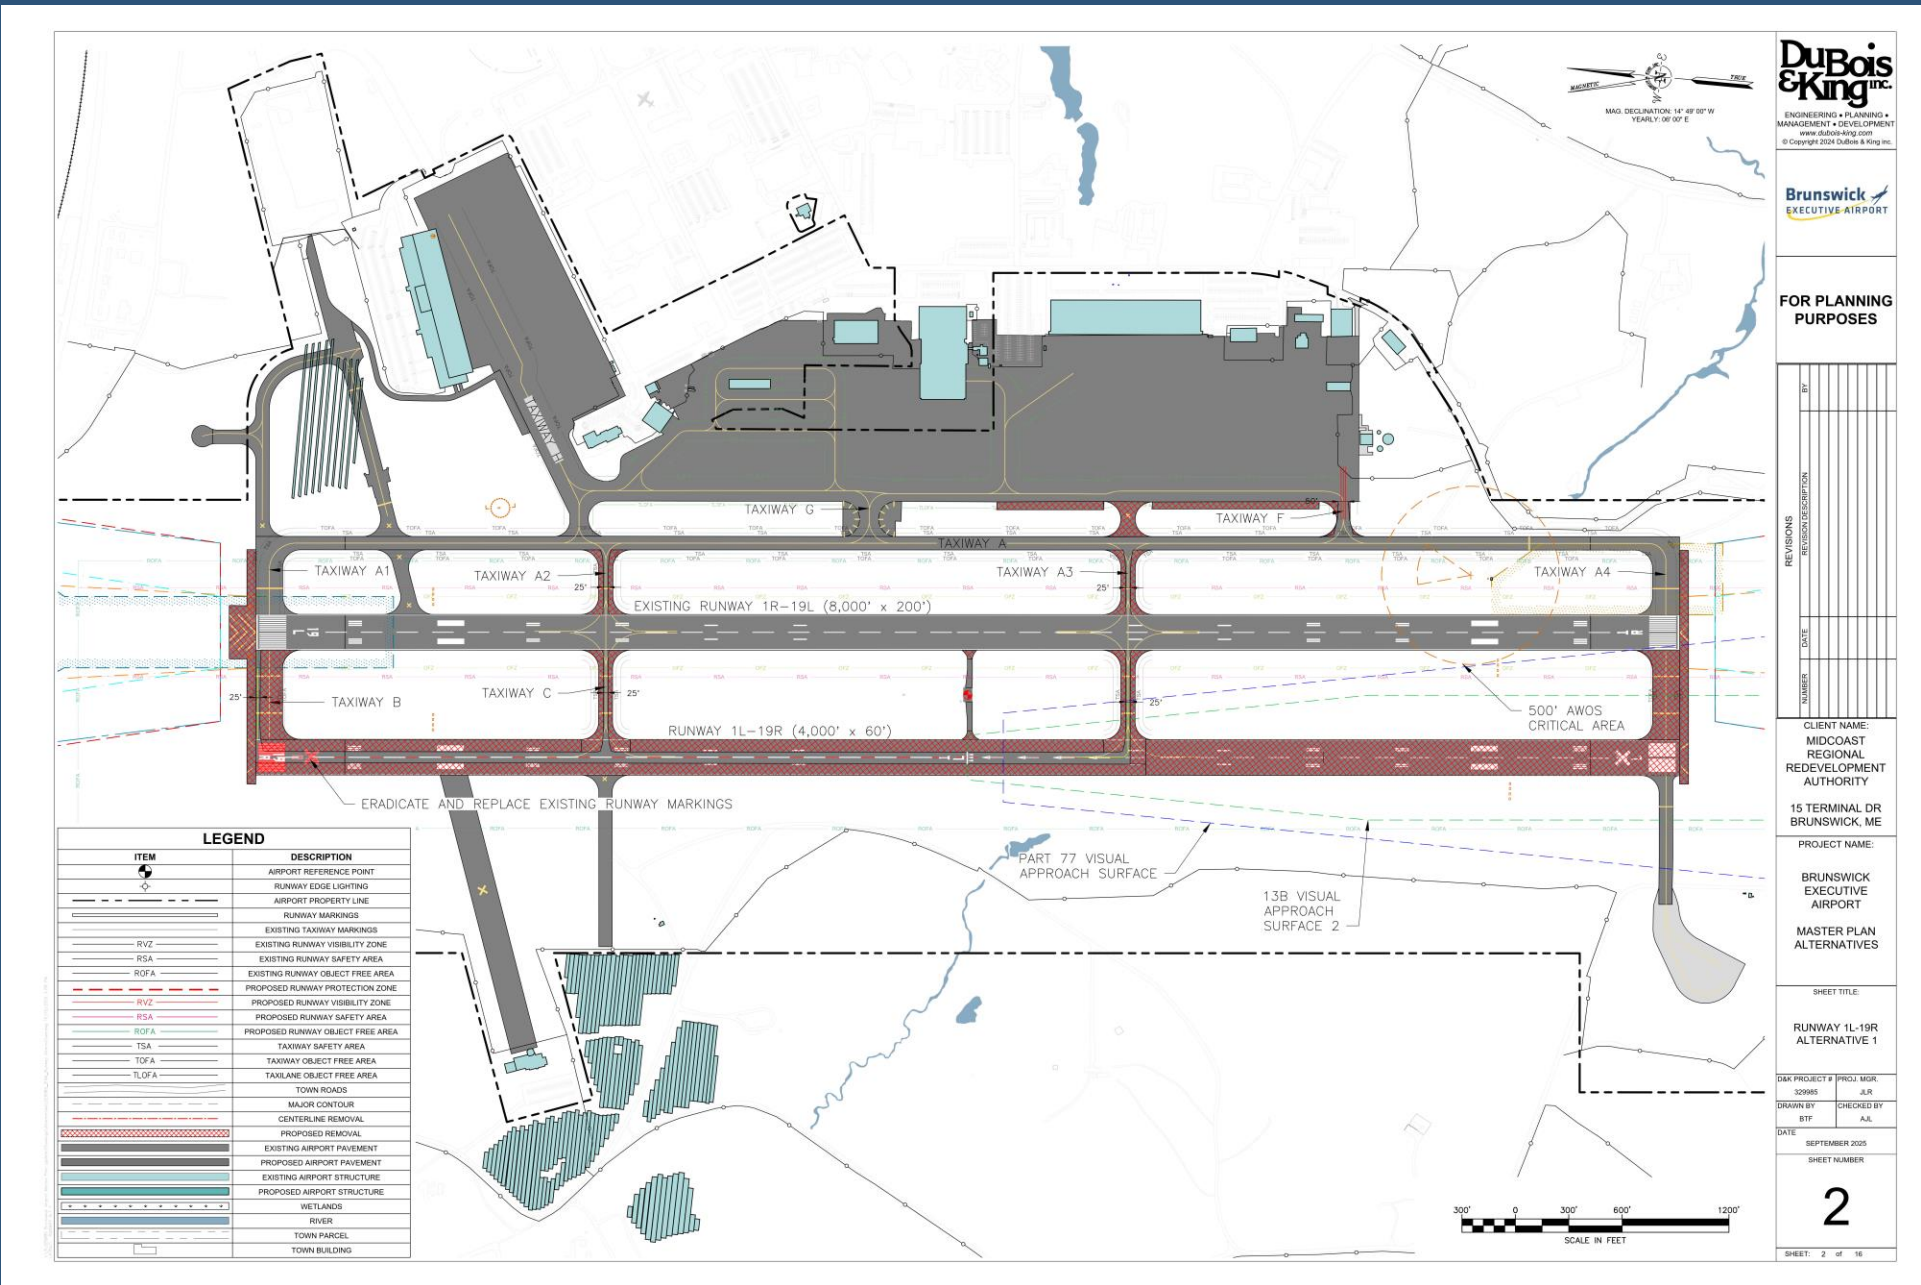

- Consider environmentally viable solutions for the current and future needs of the Airport and invest in Clean Energy Opportunities.
- Affirm the developed alternatives align the Airport's future with that of the Town and its Community.
- Develop alternatives that designate the best use of the current Airport owned parcels.
- Develop a Sustainable Implementation Plan and Funding Sources.
- Create an Efficient Timeline for the Airport's Future.
- Develop alternatives that advance the Airport as an economic driver, allowing it to contribute to the growth of the Town and the surrounding communities.
- Gain FAA approval of the Forecast and ALP.
